

Automotive Engine Rubber

Liangju Rubber is a professional manufacturer of Automotive Engine Rubber Mounting, with IATF certified. All the engine mountings we produce are with durable quality and high performance to ensure the safety and comfortable for your driving.

1. Product Introduction of the Automotive Engine Rubber Mounting

An Automotive Engine Rubber Mounting is the part that holds the engine in your car. In most cars, an engine and transmission are bolted together and held in place by three or four mounts. The mount that holds the transmission is called the transmission mount, others are referred to as engine mounts. As long as you can provide us OEM code, model, size, we have the ability to provide you with any product you need. The products we often provide are Custom rubber injection molding, Custom rubber compression molding, Rubber to metal bonding, Rubber to fabric bonding and Rubber to nylon bonding.

2. Product Parameter (Specification)

Product Name:	Rubber To Metal Bonding Bushings
Material:	NBR, HNBR, EPDM, SILICONE, VITON, FLS, FFPM, PTFE
Size:	Any size, Customized/standard and nonstandard
Color:	Black
Packing:	plastic bag&carton box or according to your requirements
Sample time:	20-25days
Application:	Automotive

Xiamen Liangju Rubber Technology Co., Ltd.

Warranty:

2years

3. our service.

1. Inquiry about our products can be replied within 12 hours.

2. Professional & experienced staff help you solve problems of silicone and rubber products.

3. Accept customized shape, material, hardness, temperature, size, color, logo and packing.

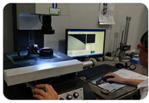

4. Mode of production: Compression or injection or extrusion.

5.We have a comprehensive range of in-house manufacturing facilities, allowing us to provide fast and effective manufacturing.

4. Quality Control and Certifications

We serve our customers with high quality Customized Shape Rubber Gaskets by strictly follow ISO 9001:2015 and IATF 16949.

6. FAQ

1. Do you supply material?

Yes, we have our own mixing rubber factory and can supply you with Synthetic Rubbers to fit your applications.

2. If OEM is acceptable?

Yes, Samples are Free of charge

3. What Is EPDM Rubber ?

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

www.tec-rubber.com

EPDM is a synthetic rubber polymer and is made from ethylene and propylene monomers. This rubber was developed in the early 1960's and used to produce variety of products like radiator and steam hoses, freezer gaskets, tires, roofing membranes and aircraft seals to name only a few.

4. Why is rubber used to produce industrial products?

Rubber has certain unique properties which makes it suitable to produce rubber products which are widely used in various industrial applications. Rubber is water repellent. It is resistant to alkalies and weak acids. Rubber has elasticity, toughness, impermeability, adhesiveness, and electrical resistance. These properties make rubber useful as an adhesive, a coating composition, a fiber, a molding compound, as well as an electrical insulator.

5. Which type of rubber is best for my application?

There are a range of natural and synthetic rubbers with different properties, making some more suitable than others for particular applications—the key of course is choosing the most appropriate one! For specific requirements, please ask our rubber products specialists for guidance.
